Becoming a Conscious Business

Expand Your Life and Work Through the Science of Energy Flow

Samuel P. Chin, co-founder and chief process scientist at Cavi Consulting, has drawn from his past experiences and professional expertise to become an author. His first book, *Becoming a Conscious Business*, describes a personal journey of study and enlightenment which led him to process science, a new paradigm for business. The book outlines an unconventional but simple framework for process optimization that can revolutionize the way a person lives and works.

Understanding the principles laid out in the book empowers the reader to develop their “process vision” and to disrupt negative, or simply ineffective, patterns of thinking which keep a person from accessing a state of flow. This enables a person to create a life and work environment which is more peaceful, productive and enjoyable.

Chin’s company, Cavi Consulting, is a process science consultancy which helps businesses remove obstacles to energy flow and more effectively automate, scale and grow by drawing on a proprietary method of process analysis and improvement. He is a recognized expert in the process improvement space, and holds an MBA from the University of Richmond. He is certified in Lean, Six Sigma, Change Management, and Project Management. The process mapping language (Cavi Mapping Language) developed by Chin has already been adopted as the global standard for multiple large enterprises. His work has also drawn greater attention to the relationship between nature conservation and business process improvement, two elements that are deeply integrated within the Cavi model.

The release date for the book is set for June 19, 2018, and will be available for purchase via Amazon.com. Visit our website www.caviconsulting.com for more information about the book and company. Sign up directly on the website to receive a notification as soon as the book is available for downloads and as a hardcover. You can also reach out to info@caviconsulting.com for information on how to request an advance copy for review.
